★★★★★

As with everything from weact studio, board is beautifully finished, the edges are smooth, everything is perfectly square & the board is annotated with the most important information. Love your work. If only this was the standard of everything sold on aliexpress! This is the third i've bought.

★★★★★

Weact never disappoints! Great quality stuff as always. The only disappointment is myself who ordered one wrong item. Not a problem, going to reorder the correct one from weact again knowing that their stuff is top notch and i will use it in a later project. Thanks weact, you are great.

Parameter

Input voltage: 7V~30V, recommended below 24V

Output voltage: 3.3V / 5V / 9V / 12V, variable multi-voltage, default 5V

Output current: 5A.Max

Characteristic

(1) Default output of 5V, voltage can be achieved by short back welding plate 3.3V / 9V / 12V output.

(2) Input voltage: 7V-30V

(3) Synchronous rectification is adopted to achieve higher efficiency

(4) The capacitor adopts large capacity ceramic chip capacitor, which has a small area, is not easy to damage and has low heating

(5) Using large current power inductance, low calorific value, with strong load capacity

(6) Low temperature drift resistance is adopted as sampling resistance to improve module stability

(7) Gold sinking process is adopted

Output parameters

3.3V/5A (use soldering iron, disconnect default 5V solder pad, short back 3.3V solder pad)

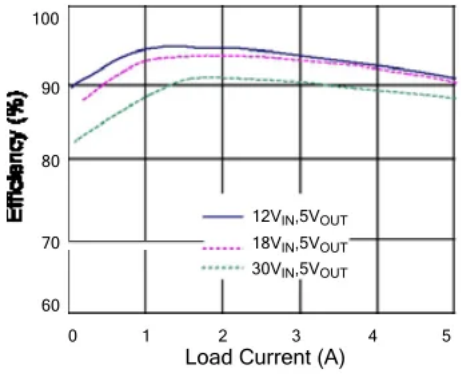

5V/5A (default: 5V)

9V/ 2.4a (use soldering iron, disconnect default 5V soldering pen, short back 9V soldering pen)

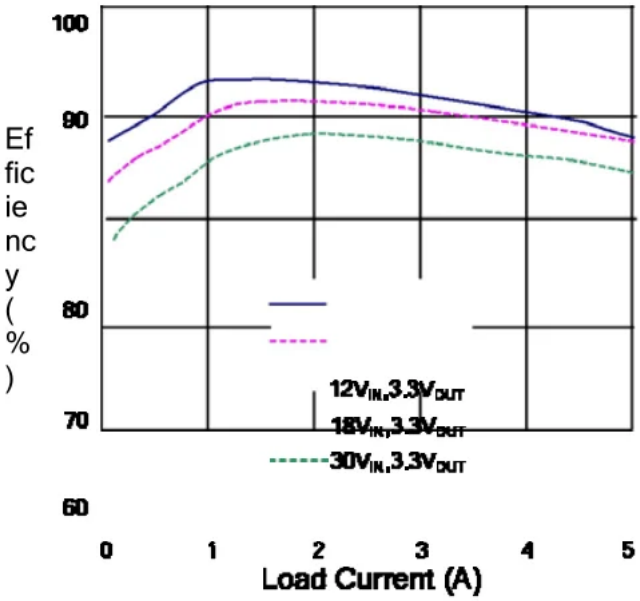

12V/ 1.5a (with soldering iron, disconnect default 5V solder pad, short back 12V solder pad)

Note: Please add fan heat for continuous large current (just add fin)

Some data manual parameters:

Efficiency vs. Load Current

Features

- Low $R_{DS(ON)}$ for internal switches (top/bottom): 70/40 mΩ
- 4.5-30V input voltage range
- Instant PWM architecture to achieve fast transient responses
- External softstart limits the inrush current
- Pseudo-constant frequency: 500kHz at heavy loads
- 5A continuous, 6A peak load current capability
- 1.5% 0.6V reference
- Output over current limit
- Output short circuit protection with current fold back
- Thermal shutdown and auto recovery
- RoHS Compliant and Halogen Free
- Com act package: DFN3x4-12/SO8E

Applications

- LCD-TV
- SetTop Box
- Notebook
- Storage
- High power AP router
- Networking

Application Scenario

Power supply for robot control system, UAV control system, steering gear and small power motor, LED lamp, etc

Buyer Questions & Answers (2)

For what purpose can I utilize this item?

It can be put into use for Steering gear.

how do I change the voltage output to 5v

For what purpose can I utilize this item?

It can be put into use for Steering gear.
